

# The Lake Region Greenprint: A Community Partnership

## Protect Water Resources

0 1.25 2.5 5 Miles

### Legend

#### Protect Water Resources

- High Priority
- Moderate-High Priority
- Moderate Priority
- Conservation Parks and Land \*
- Conservation Easements

#### Transportation

- Interstate
- Principal arterial
- Major Road
- Minor Road
- Railroad

#### Water Features

- Lake
- River or Stream
- Township Boundary
- County Boundary

\* Conservation Parks and Land includes areas managed by federal and state agencies, land trusts, municipal greenspaces and the University of Maine preservation lands.

Carroll County, NH

This map displays the results of the Protect Water Resources analysis, a conservation goal within the Lake Region Greenprint. The degree of priority for each area is shown with a color scale with dark red representing high priority and orange representing moderate priority.

These priorities are the result of a weighted analysis on the following criteria:

|  |      |
|--|------|
| Aquifers for drinking water                      | 15 % |
| Public surface water supplies                    | 15 % |
| Headwaters                                       | 15 % |
| Wellhead Protection Areas                        | 11 % |
| Wetlands that function for ground water recharge | 11 % |
| Lakes, Ponds, Rivers, and streams buffers        | 11 % |
| Wetland buffers                                  | 6 %  |
| DEP AA Water Quality Classification              | 4 %  |
| Steep slopes                                     | 4 %  |
| Areas Subject To Flooding                        | 4 %  |
| Poorly Drained Soils                             | 4 %  |
